BIOINSIDE

Animal health distribution and sales, import and export

Korean and imported animal health products,
sold through a nationwide dealer network

Company profile bioinside.kr

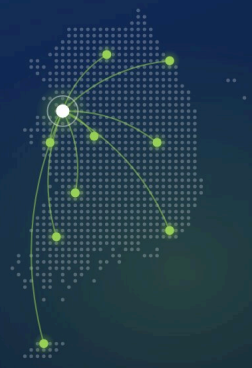

Who we are

A nationwide sales network for Korean and overseas manufacturers

BIOINSIDE sells veterinary medicines through a network that runs from animal health dealers and veterinary clinics to farms across Korea. We sell on behalf of Korean manufacturers and importers, import products directly from overseas manufacturers, and export veterinary medicines made in Korea.

Distribution and sales

Our sales network runs from animal health dealers and veterinary clinics to farms across Korea

Import and export

We import products from overseas manufacturers for the Korean market and export veterinary medicines made in Korea

Cold-chain logistics

We store and distribute veterinary medicines of every kind, refrigerated or frozen

Technical service

Vaccination programmes, disease response consulting and product training for each species and farm

Sales network
Dealers, veterinary clinics, livestock integrators and farms nationwide

All species
Poultry, swine, cattle, aquaculture and companion animals

Cold chain
Refrigerated and frozen storage for veterinary medicines of every kind

Sales network

Your products, sold in every region of Korea

Animal health dealers across Korea stock and sell the products we supply, and our sales team works with them in the field. We also sell directly to veterinary clinics, livestock integrators and farms.

Dealers in every region

From Gyeonggi to Jeju, our dealer network covers the whole country

Who we sell to

Animal health dealers
Stock our products and sell them to farms in their area

Veterinary clinics
Livestock and companion animal clinics

Livestock integrators
Poultry, swine and other integrated livestock companies

Farms and associations
Key farm accounts and regional livestock associations

How we sell

Field sales team
Regular visits to dealers, clinics and farms in every region

Product training
Dealer and customer training on each product's key benefits

Promotions
Campaigns that support sales of each product

Sales reporting
Sales and stock data shared with the manufacturer

What we do

Four lines of business

01 Distribution and sales

Our sales network runs from animal health dealers and veterinary clinics to farms across Korea. We handle vaccines and other biologicals, pharmaceuticals, feed additives, veterinary devices and diagnostics from Korean and overseas manufacturers, and manage each product according to its storage conditions and shelf life.

Range	Biologicals (vaccines), pharmaceuticals, feed additives, veterinary devices, veterinary diagnostics
Route	BIOINSIDE → animal health dealers and veterinary clinics nationwide → farms and end users
Ordering	Directly from our head office or through a BIOINSIDE partner dealer or veterinary clinic

02 Import and export

We sign supply agreements with overseas manufacturers and import their products. After customs clearance, products go through quality testing and lot release and are then sold through our network in Korea. For veterinary medicines made in Korea, we handle everything from checking overseas demand to registration and export.

Import	Supply agreement → import requirements and customs → quality testing and lot release → sales through our network in Korea
Export	Overseas demand and local market research, registration abroad and export on behalf of manufacturers
Planning	Annual volumes agreed with manufacturers, stock and expiry managed in our dedicated warehouse
Sales support	Sales and stock reports shared with manufacturers, promotions to support sales

03 Cold-chain logistics

With refrigerated and frozen storage, we can store and distribute any veterinary medicine, whatever its storage temperature.

Storage	Refrigerated and frozen storage, receiving and dispatch
Delivery	Courier and freight nationwide

04 Technical service

We advise on vaccination programmes and disease response for each species and farm, and run product training for dealers and farms.

Consulting	Vaccination programmes and disease response by species and farm
Training	Product training and seminars for dealers and farms

Facilities

Our warehouse and cold chain

Our head office in Hwaseong, Gyeonggi-do, houses the warehouse and walk-in cold rooms. Each product is stored refrigerated or frozen according to its requirements and shipped nationwide through our cold chain.

Head office and warehouse, Hwaseong

Warehouse interior and walk-in cold room

- Indoor and outdoor cold rooms and freezers
- Temperature control panels and central monitoring
- Stock managed by storage condition and expiry date
- Cold-chain delivery nationwide via a logistics partner

Work with us

Who we work with

Overseas manufacturers

If you want to supply products to Korea, we handle import, storage, nationwide distribution and sales, and on-farm technical support.

Companies looking for a sales network

Manufacturers and importers in Korea can reach the market through our dealer network and other sales channels.

Korean manufacturers looking to export

We help Korean animal health manufacturers sell their products in overseas markets.

Dealers, farms and vets

Orders are packed for each product's storage temperature and shipped. Technical advice is available too.

For overseas manufacturers

What we handle

- Import and customs clearance
- Refrigerated and frozen storage
- Sales through our nationwide dealer network
- Technical service on farms

Send us your product information and the terms you have in mind. We will reply after reviewing them.

What to send us

- ✓ Product summary (active substance, dosage form, target species)
- ✓ Product leaflets and technical documents
- ✓ Registration status in Korea and elsewhere
- ✓ GMP certificate for the manufacturing site
- ✓ Storage and transport temperatures
- ✓ Preferred terms (exclusivity, supply price)
